		TRACK WIDTH	EXACT HEIGHT					LEFT	RIGHT (STANDARD)		

Notes on ordering Panel Track:
 Measure exact width and height of area to be covered. No allowance will be made by factory for width or height.
 Track width = length of panel track plus endcaps.
If measuring to the floor, 1/2" to 3/4" deduction is recommended. It is your responsibility to make deduction.
 For panel track installed above the window frame, the track should be installed at least 2" above the frame to allow the foot of the bracket to be properly installed.
 Control wand is aluminum. Select 36", 48" or 60" (Standard) height on form above.
 Draper does not provide fasteners. It is installer's responsibility to select appropriate fasteners.
CHILD SAFETY NOTICE: This product complies with ANSI/WCMA A100.1-2022-Child Safety Standard.
